GLASS SCRATCH REMOVAL

THE GLASS SCRATCH REMOVAL SYSTEM THAT WE USE IS LABORATORY TESTED AND HAS QUALIFIED TO THE BSI ECE REGULATION 43 TO BE DISTORTION FREE.

THE SYSTEM USED IS NON-ABRASIVE (DOES NOT REMOVE LAYERS OF GLASS TO REMOVE THE SCRATCH)

THE GLASS SCRATCH REMOVAL PROCESS HAS A CHEMICAL, MECHANICAL AND POLISHING ACTION WHICH IN CONJUNCTION WITH HEAT AND WATER MOVES THE GLASS MOLECULES AROUND TO FILL THE SCRATCH WITHOUT REMOVING GLASS STOCK.
